

Loading & Unloading Guide

Recommended solution: DGWO — single-goal packer, repeat code 3

The method recommended for this load on the Results page; this is its best run.

**Loading:** go down the list. Start at the cab end and work toward the rear door, putting floor boxes in first and building up. Positions are in cm: x across the truck, y from the rear door, z above the floor. Sizes are as placed: across × deep × high; the line under each size says which way the box stands.

Container arrangement

Door and cab end marked; 587 × 233 × 220 cm (length × width × height).

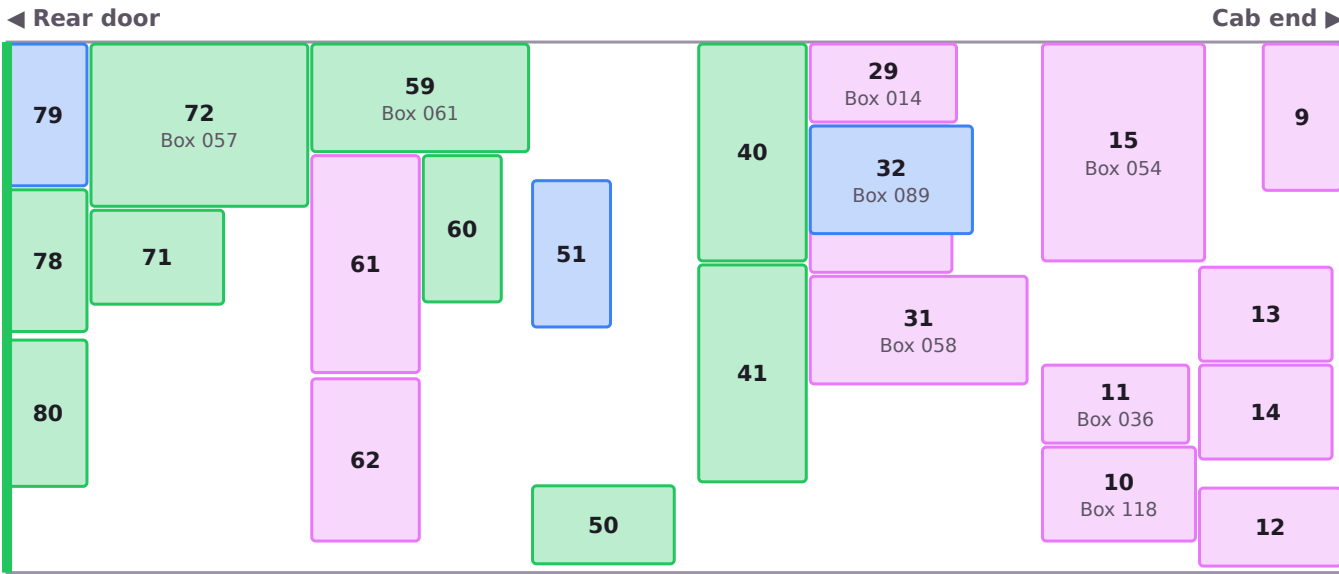

Stop 1 (unloaded first) Stop 2 Stop 3

Numbers are loading steps (Page 1). A box too small for its number is listed in the key below.

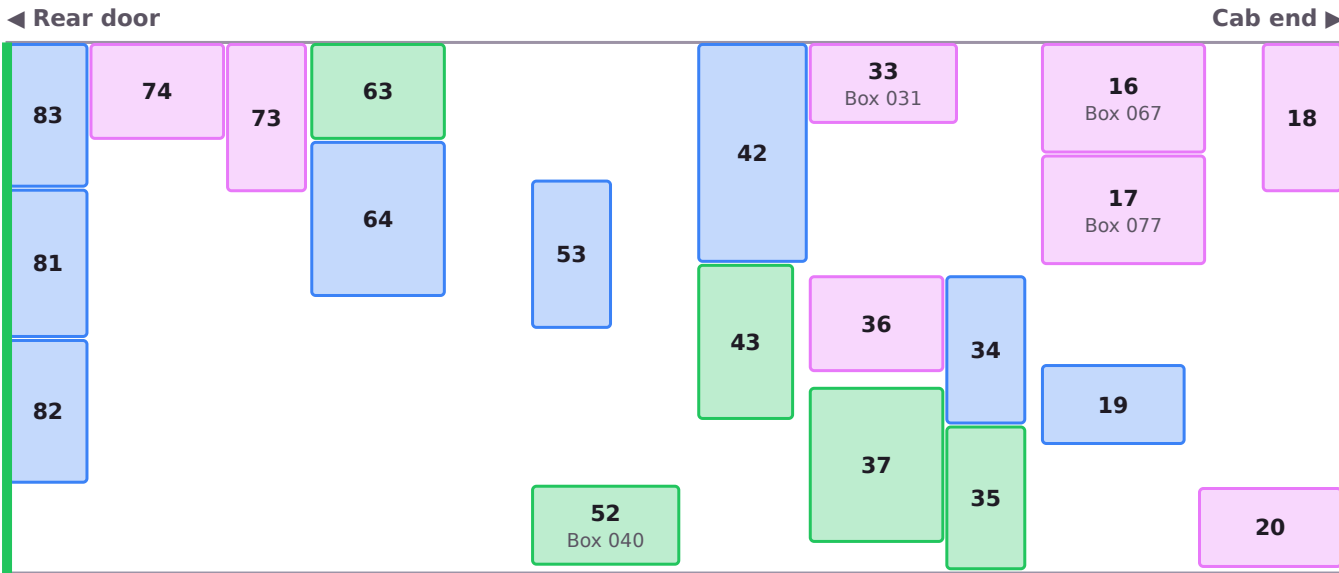

Top view — Layer 1: boxes whose bottom is 0-55 cm above the floor (38 boxes)

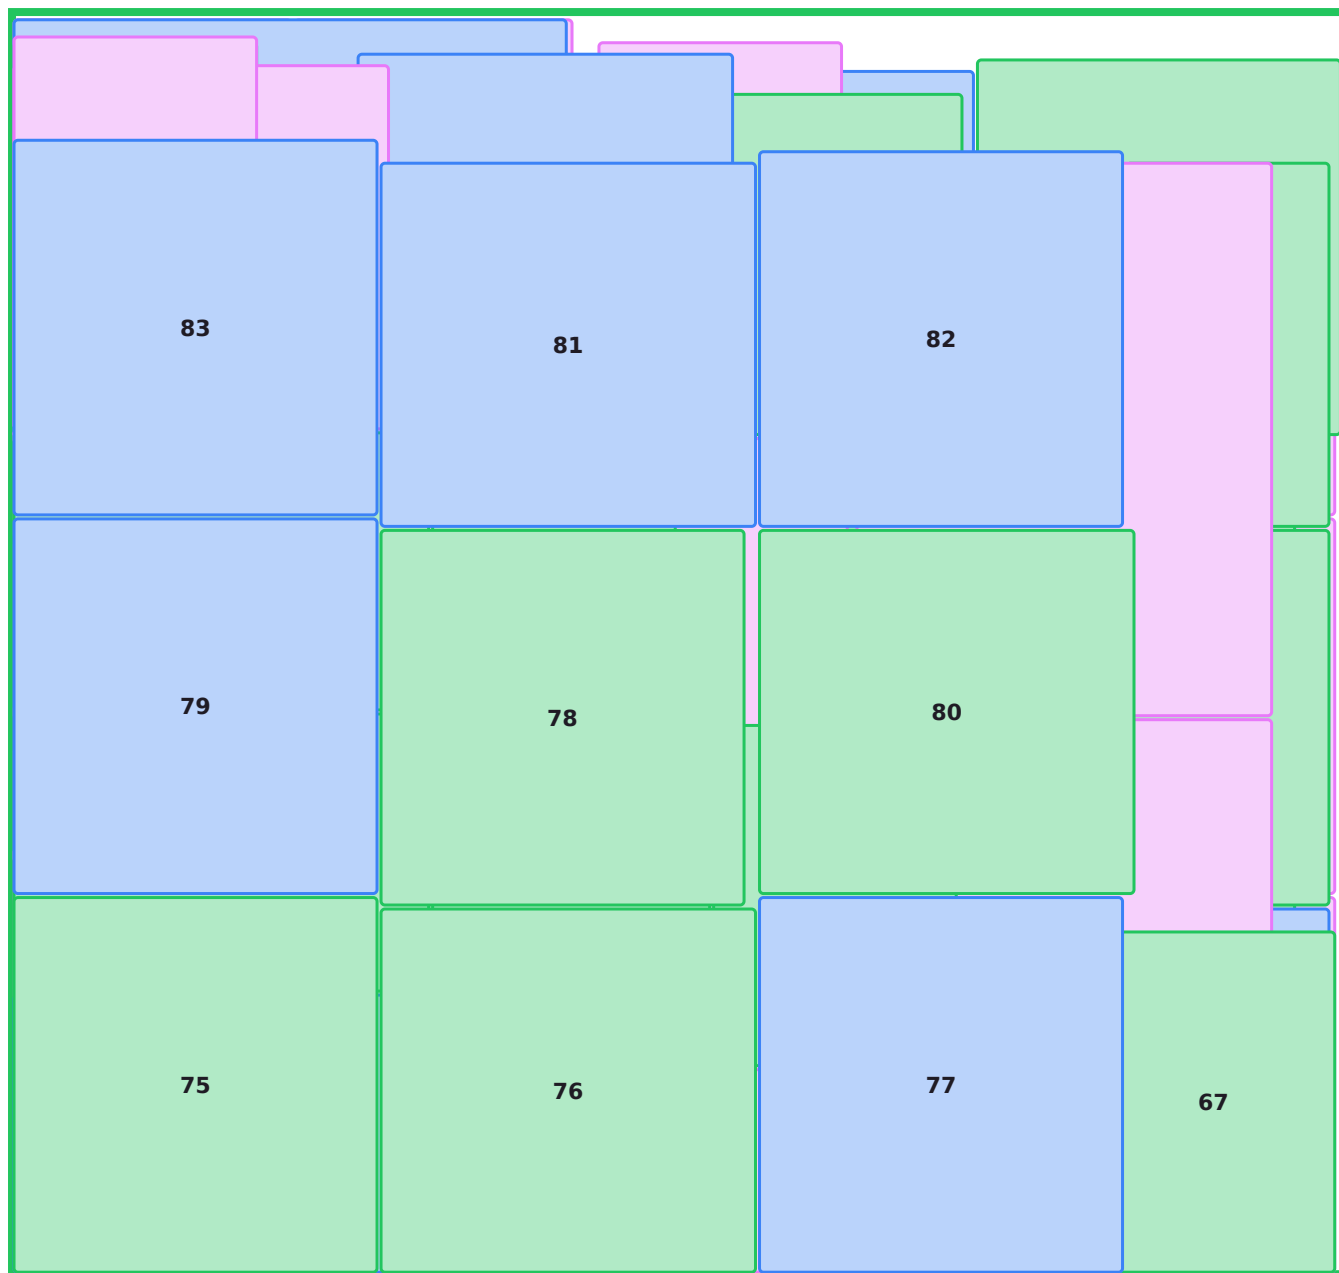

Top view — Layer 2: boxes whose bottom is 55-110 cm above the floor (24 boxes)

Top view — Layer 3: boxes whose bottom is 110-165 cm above the floor (21 boxes)

## View from the rear door

Floor · seen from the rear door (the door frame is the green outline)
